# CANDULOR PROSTHETIC SYSTEM

## 2010 Hands-on Laboratory Courses

The Candulor Denture System is the premiere denture system used in Switzerland and throughout many parts of Europe.

The Candulor Denture System creates natural esthetics through anterior setup and natural physiologic modeling of the gingival, including multi-colored characterization and tissue staining.

## Course 1 FULL LABORATORY COURSE

Learn the laboratory procedures for the complete Candulor Denture System, which includes the Candulor lingualized set up, the fabrication of the natural gingiva, and custom tinting of the denture base.

- Introduction to “KunstZahnWerk” (The Swiss Art of Prosthetics)
- Presentation of the Candulor lingualized occlusion System
- Practice-oriented model analysis and information evaluation
- Setting up the anterior teeth for optimal aesthetics
- Set-up of posterior teeth according the lingualized Occlusion, with the Condyliform teeth guided by the model analysis
- Physiological contouring of gingiva in accordance of hygiene and functionality
- Custom tinting of the gingiva using the Candulor Aesthetic Color Set
- Flasking in and multi-colored packing using the PolyMaster Color Cure Processing flask
- Re-occlusion and grinding-in of dentures for functional tooth restoration
- Finishing and polishing of the denture

### What to Bring:

- Instruments for wax-modeling
- Lab Coat

The final results of constructing dentures utilizing the Candulor technique are dentures of unsurpassed quality and superior patient satisfaction.

This course will help you provide your clients with dentures of unparalleled quality, comfort and beauty.

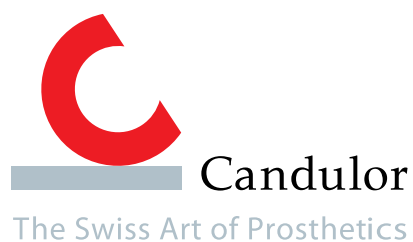

## Course 2 AESTHETIC COURSE

Learn the art of producing a personalized complete prosthetic through this intensive two day hands-on course. Course participants will learn a rapid means of producing individually characterized and colorized removable prosthetics through the use of Candulor’s Aesthetic Color Wax Set and Aesthetic Color Set Easy.

- Use of Stains for Resin and Porcelain Teeth
- Communication of Gingival Colors
- Creating Harmony with Gingival Base and Facial Color
- Modeling of gingival texture
- Jointly working out a formula for the pink aesthetics
- Characterized Gingival Wax Contours and Modeling
- Multi-colored packing of gingiva with Aesthetic Color Set Easy
- Surface finishing and polishing

### What to Bring:

- Instruments for wax-modeling
- Lab Coat

## COURSE INSTRUCTORS

### PIUS JOHANNES OBWEGESER, MDT

Mr. Obwegeser is responsible for the international course programs for Candulor Switzerland. He is also an instructor at George Brown College teaching courses for denturists, and lectures Gerber Prosthetics at master schools in Frankfurt, Stuttgart, Freiburg and Dortmund. From 1985 through 2002, Dr. Obwegeser owned his own dental lab and previously was a dental technician and junior technician studying under Dr. Josef Koller.

### ANTONIO FERILLI, MDT

Mr. Ferilli practiced as a dental technician for fifteen-plus years in Switzerland and abroad. In 1997 he earned his master’s degree at Master School in Zürich, where he is currently teaching. He has spent a number of years focusing on the functions and aesthetics of the full denture. Since 2000, Antonio has been the Head of Product Management for Candulor where he leads several projects such as the posterior tooth line, Condyliform® II as well as the new anterior tooth line, Candulor PhysioStar®.

### ROBERT KREYER, CDT

A member of the American Prosthodontic Society, National Association of Dental Laboratories, and the L.D. Pankey Alumni Association. He is a registered continuing education provider for the Dental Board of California and the National Board of Certification for Dental Technology. Robert is a consultant and continuing education course instructor for Ivoclar Vivadent of North America and Candulor AG in Zurich, Switzerland. He has written numerous articles on complete denture prosthetics and lectures throughout the United States.
